Vacancy Details: -

Our workload is increasing through repeat business from existing clients along with a growing network of new clients and potential future leads. This is pushing the growth of our business, so we are looking for young talent to develop and grow with us - and to ultimately be an important part of managing the business.

We are looking for enthusiastic, personable, reliable and highly motivated individuals with an interest in design, engineering or construction. Good qualifications or exam results in English, Maths and Physics are important. Good computer skills are also useful.

Individuals need to be capable of working as part of a team. They also need to be able to take the initiative and work independently to deliver work to a high standard and to sometimes challenging timescales.

We recognise that development will rely on effective mentoring. The successful applicant will have the opportunity to work closely alongside the company directors and get involved in project activities such as building surveys, design workshops and client meetings. We will also offer direct support to develop key skills such as report writing, technical authoring (selecting and specifying systems and components) and creative and efficient design.

Position: - Digital Engineering Technician

Location: - Peterborough Office

Start Date: - September 2019

Apprenticeship Duration: - 3 years. Reviewed annually with a probation period lasting 6 months

Salary: -

The initial salary offer will be set at the appropriate minimum wage for your age. In addition to this we will make monthly contributions to a personal development fund over the first 12 months. After the initial probation period we will assess your aptitude, abilities and performance - including training results - and pay out all or some of this fund as either a salary increase or a series of cash bonuses.

After the first year, and once we are all happy you have made the right career choices your salary will be set at the industry standard for your age and experience.

Benefits: -

- Travel expenses to your place of training.
- Book allowances and paid training courses to assist your development in key skills.
- Performance bonus paid out over the first year.
- Profit share bonus paid out after the second year.
- Full-time position available on completion. What position this ends up being will depend on your interests and skills.
- Support for higher level education and training (i.e. a degree or chartered engineer status) on successful completion of your apprenticeship.
- An opportunity to start your career in a healthy, young business; to grow with it and be an integral part of its success.

Education Opportunities and Development: -

- Level 3 Apprenticeship (Advanced).
- Training to BTEC Level 3 / NVQ Level 3 Diploma at iMET local technical college.
- Further training courses as required to develop specific skills.
- Work experience within a building services design environment: including electrical engineering design (lighting, power distribution, communication, safety and security systems), mechanical engineering design (heating, ventilation, air conditioning and public health systems), AutoCAD, 3D modelling simulations, calculations, schedules, specifications, report writing, meetings and site visits.

Working Hours: - 37.5 hours around core hours (Monday to Friday 09:00 to 17:30), including training and education.

Holidays: - 20 days per year (excluding bank holidays) with an additional 5 days offered at our discretion.

Application Requirements: -

Applications can be made in writing along with a brief Curriculum Vitae. This should be on a single page and focus on your interests and career ambitions as much as your qualifications. Punctuality and reliability will be important for us so if you have good attendance records or awards, please include them.

Provide references please. Also let us know if you have any specific needs or requirements for an interview should you be successful. We will cover travel expenses if you need to use public transport in attending an interview.

Applications should be made in writing or via email to: -
